

POWER INPUT

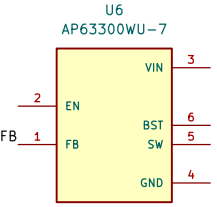

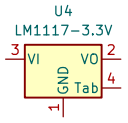

24V -> 5V Regulator

TODO 2:

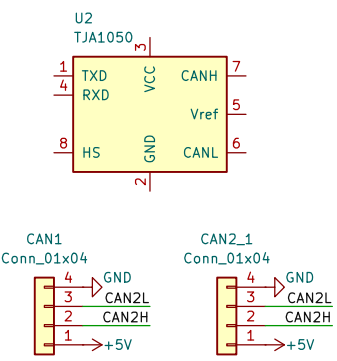

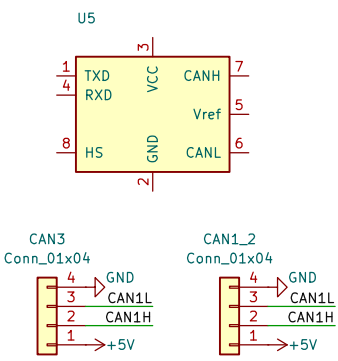

5V -> 3.3V Regulator

TODO 1:

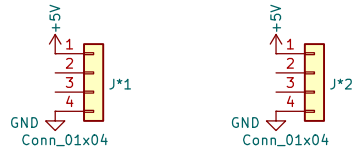

CAN Signal Transceiver

TODO 3:

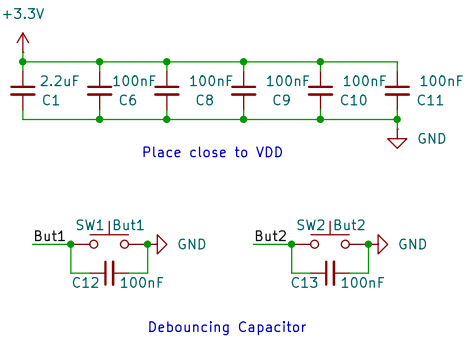

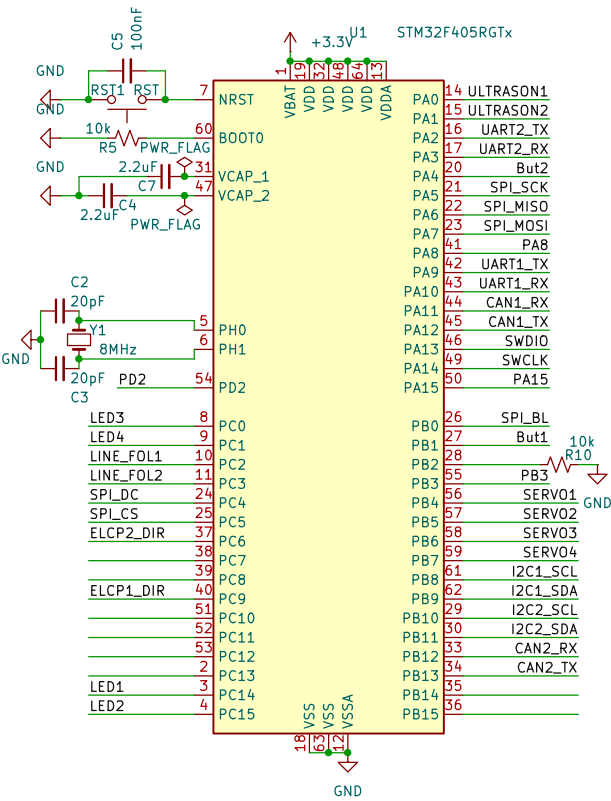

GPIO

TODO 4:

NOTE: It's easier than you think

MCU

TODO 4:

Fill in the blanks for all the unconnected MCU pins, list of signal nets to be put at:

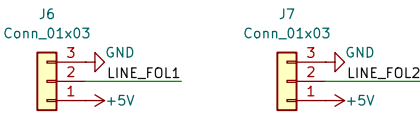

COMPULSORY: TODO 4

PC10
PC11
PC12
PC13

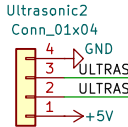

**If you are not doing the optional part, please mark all the un-used MCU pins with "x"

*Please check out the PDF/MD file for the optional task
OPTIONAL: TODO 5 & 6
ELCP1_PWM-3.3
ELCP1_FB-3.3
ELCP2_PWM-3.3
ELCP2_FB-3.3
