

POWER INPUT

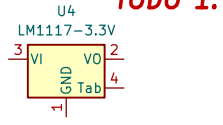

12V -> 5V Regulator

TODO 2:

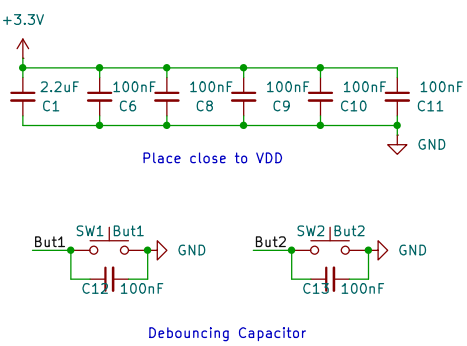

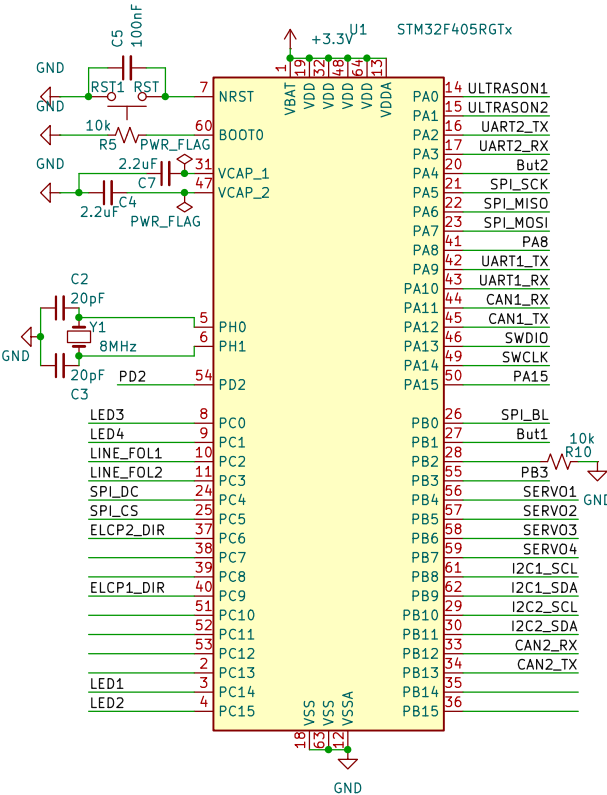

5V -> 3.3V Regulator

TODO 1:

MCU

TODO 5:

Fill in the blanks for all the unconnected MCU pins, list of signal nets to be put at:

TODO 5

PC10

PC11

PC12

PC13

**If you are not doing the additional task (optional), please mark all the un-used MCU pins with "x"

*Details of additional task is

ELCP1_PWM-3.3

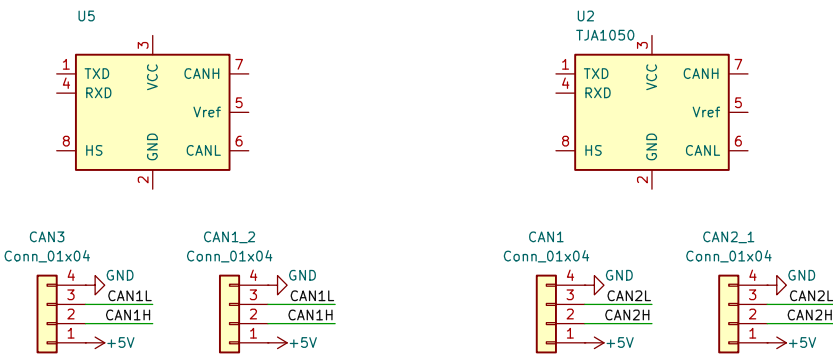

ELCP1_FB-3.3

ELCP2_PWM-3.3

ELCP2_FB-3.3

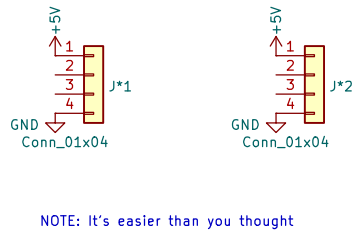

CAN Signal Transceiver

TODO 3:

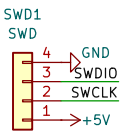

GPIO

TODO 4:

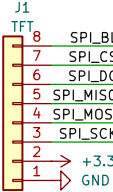

NOTE: It's easier than you thought

SWD

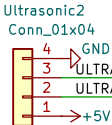

TFT

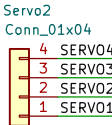

Line Fol Sensors

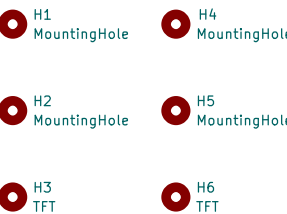

Ultrasonic Sensor

Servo Motor Signals

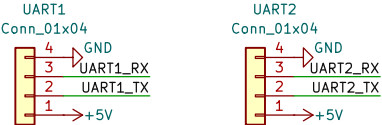

Mounting Holes

I2C

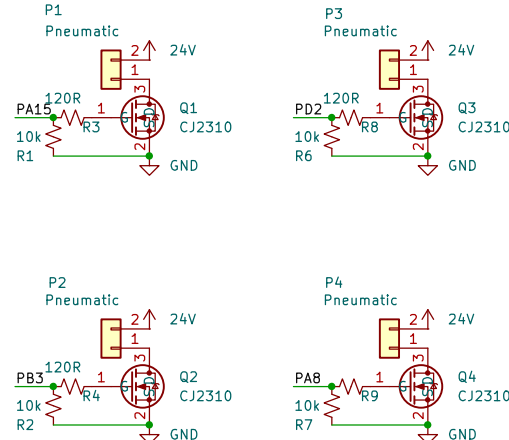

UART

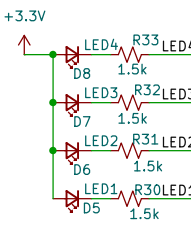

Additional Space

Pneumatic
